

File #: SER023-08 Supplemental Correction Report

Date: 06 August 2008

Report of Expert

Expert's Name: Stephen Fratpietro
Title: Technical Manager, Paleo-DNA Laboratory

I, the undersigned, as requested by Eliza Presley, submit my professional opinion in reference to the following matter: A major error was discovered in the kinship calculation database used for the kinship analysis of all SER023-08 casework. This report contains all the corrected data and calculations.

REPORT: The following information is the corrected data for all kinship calculations relating to SER023-08.

PDL Case Designation	Individual 1	Individual 2	Kinship Index
SER023-08 Supplemental	Eliza Presley	Jesse Garon Presley	0.496
SER023-08 Supplemental 2	Eliza Presley	Elvis A. Presley's 1 st cousin/Paternal	0.461
SER023-08 Supplemental 3	Jesse Garon Presley	Elvis A. Presley's 1 st cousin/Paternal	1.02
SER023-08 Supplemental 5	Tim J. Farrell	Eliza Presley	0.00605
SER023-08 Supplemental 6	Jesse G. Presley	Elvis A. Presley's 1 st cousin/Maternal	0.307
SER023-08 Supplemental 7	Eliza Presley	Elvis A. Presley's 1 st cousin/Maternal	0.0272

When the kinship index is less than or equal to one, the data provides no evidence to support a relationship between the two individuals. Therefore, the data above does not provide support for a biological relationship in any of the above comparisons.

NOTES:

The calculations used for the corrected kinship test were tested and verified to ensure their accuracy. This analysis complies with the requirements requested by the client. Details of the experimental procedures and analysis of this case are found in the case file of the Paleo-DNA laboratory, case number SER023-08.
